EXAMINER STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicants' arguments are persuasive that *Maybury et al.* at least fails to disclose deriving a topic for each of the semantically coherent text blocks based on a set of topic category models. *Maybury et al.* does not expressly disclose topic category models for generating a topic, nor it is clear that any topic derived is based on semantically coherent text blocks. The prior art of record does not disclose or reasonably suggest all the limitations of independent claims 1 and 14, including identifying a target speaker using audio and visual components, deriving a topic for each of semantically coherent text blocks based on a set of topic category models, and generating a multimedia description based on an identified target speaker. Applicants' Specification, Page 3, Lines 3 to 11, discloses that compared with conventional linear browsing on keywords, a non-linear browsing capability is desirable when huge amounts of information are involved.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
